

Chula Vista Elementary School District 2022-23 Local Measures Assessments

Achieve3000 Literacy LevelSet

LevelSet is an online assessment of reading ability for grades 2-12 that Achieve3000 developed in conjunction with MetaMetrics, the makers of the Lexile Framework for Reading. The Lexile score from LevelSet provides measurable data of a student's reading ability. The same scale is used to measure the text difficulty of Achieve3000 lessons.

Smarty Ants NEW Lexile Assessment

The Smarty Ants LevelSet was also developed by Achieve3000 in conjunction with MetaMetrics. The Lexile score from Smarty Ants LevelSet provides measurable data of a student's reading ability. The Smarty Ants LevelSet assessment measures the development of reading ability in students' grades PreK through 2. Lexile scores for students taking this assessment will be shared with families at the fall conference.

Your child's End-of-Year score is the percentage of the questions on this assessment that were answered correctly. The percentages of questions answered correctly for each tested literacy skill provides an estimate about the development of specific reading skills. Because your child only answered a small number of questions for each reading skill, this data is not the only assessment used for measuring reading skills.

i-Ready Math Diagnostic

The i-Ready Math Diagnostic is an assessment that adjusts its questions to meet your child's needs. Each item a student sees is individualized based on their answer to the previous question. The goal is for your child to be performing at or above grade level, which means they have mastered the skills students at that grade level are expected to master and are prepared to learn more advanced skills.

Achieve 3000 Literacy LevelSet

LevelSet es una evaluación en línea de habilidades de lectura para grados 2-12 que Achieve3000 desarrolló en conjunto con MetaMetrics, los creadores de Lexile Framework para lectura. El puntaje de lexil de LevelSet proporciona datos medibles de la habilidad de lectura de un estudiante. La misma escala se usa para medir la dificultad del texto de las lecciones de Achieve3000.

NUEVA Evaluación de Lexil Smarty Ants

Smarty Ants LevelSet también fue desarrollada por Achieve3000 en conjunto con MetaMetrics. El puntaje de lexil de Smarty Ants LevelSet proporciona datos medibles de la habilidad de lectura de un estudiante. La evaluación Smarty Ants LevelSet mide el desarrollo de la capacidad de lectura de los estudiantes en los grados de preescolar a 2º grado. Los puntajes de lexil para los estudiantes que toman esta evaluación se compartirán con las familias en las conferencias de otoño.

El puntaje de fin de año de su hijo es el porcentaje de las preguntas de esta evaluación que se respondieron correctamente. Los porcentajes de preguntas respondidas correctamente para cada habilidad de lengua y literatura evaluada proporciona una estimación sobre el desarrollo de habilidades de lectura específicas. Debido a que su hijo sólo respondió un número pequeño de preguntas para cada habilidad de lectura, estos datos no son la única evaluación utilizada para medir habilidades de lectura.

i-Ready Math Diagnostic

i-Ready Math Diagnostic es una evaluación que ajusta las preguntas para cumplir con las necesidades de su hijo. Cada artículo que un estudiante ve es individualizado basado en su respuesta a la pregunta anterior. El objetivo para su hijo es desempeñarse en o por encima de nivel de grado, lo que significa que ha dominado las habilidades que se espera que los estudiantes de ese nivel de grado dominen y estén preparados para aprender habilidades más avanzadas.
