CONTRACTING FOR PERSONAL CONSULTING SERVICES

The District is permitted to secure the services of consultants when it has been clearly determined that such consultants can provide valuable and necessary services not normally required on a continuing basis and which cannot be otherwise provided because of limitations of time, experience and knowledge.

Consultants are independent contractors who are specially trained, experienced, competent or uniquely qualified to perform the services required and are retained in accordance with the Government Code, Public Contract Code, and California School Accounting Manual.

Legal Reference:

EDUCATION CODE
