RELEASE OF PUPIL WORK FOR PUBLICATION

It shall be the policy of the District to release work of pupils for publication in School publications with the permission of the pupil. Parental consent generally will not be required for release of pupil's work, except under certain circumstances, at the District's discretion, when the pupil's work will be used for publication outside of the District or in situations where use or publication of the work may result in the generation of profits. In situations in which parental consent is required, but not in contests or academic competition situations, the parent will be required to agree to waive the parent or child's right to pursue any claims the parent or child may have with regard to damages the parent or child may sustain resulting from the publication of the work, including claims for loss of profits and copyright infringement.
