TUBERCULOSIS TESTING

The Governing Board recognizes that tuberculosis poses a public health threat. Treatment of active cases of this disease is the most effective means of controlling its spread.

The Superintendent or designee may require a tuberculosis skin test when qualified medical personnel reasonably suspect that a student has active tuberculosis. If there is an outbreak of tuberculosis at any school, the Superintendent or designee may require all students at the school to undergo tuberculosis skin tests under the direction of the local health officer.

Students known to have had a positive tuberculosis skin test shall be excluded from school until they provide evidence of a follow-up x-ray and appropriate medical care or are no longer suspected of having active tuberculosis.

(cf. 5112.2 – Exclusions from Attendance)
